

Fiberglass Enclosures

For The Wastewater Treatment
Industry

Wastewater Depot, LLC.

Fiberglass Sound Enclosure for Blower Motor Units. The Wastewater Depot multi purpose fiberglass all weather enclosure is tough, light weight, non-conductive, corrosion resistant, maintenance free and easy to install. The enclosure is designed to enhance the installation of any packaged system. The unit protects the equipment with strong and durable fiberglass construction. Our standard enclosure sizes offer a wide range of equipment installations, meeting the size requirements of almost every blower installation

WWD has four different fiberglass enclosures which includes both the weatherproof hood and reinforced fiberglass base. The hoods can be fitted with louvers for ventlation.

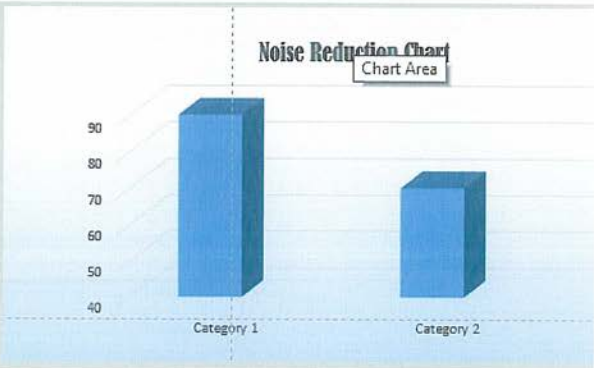

On the larger fiberglass enclosures dual blower units can be installed easily. In addition Inlet air filters, mufflers and discharge mufflers can be supplied. The pressure relief valves and pressure gauge can be installed.

Wastewater Depot, LLC. ---132 State Route 132--- Batavia, Ohio 45103 -- 513-735-2777

The "TIPTON" fiberglass sound enclosure for wastewater treatment systems can greatly reduce the noise level being produced by the operating unit. Both inlet and outlet mufflers can be added to achieve a much quieter operating system. The chart shown the approximate noise reduction of using this arrangement.
